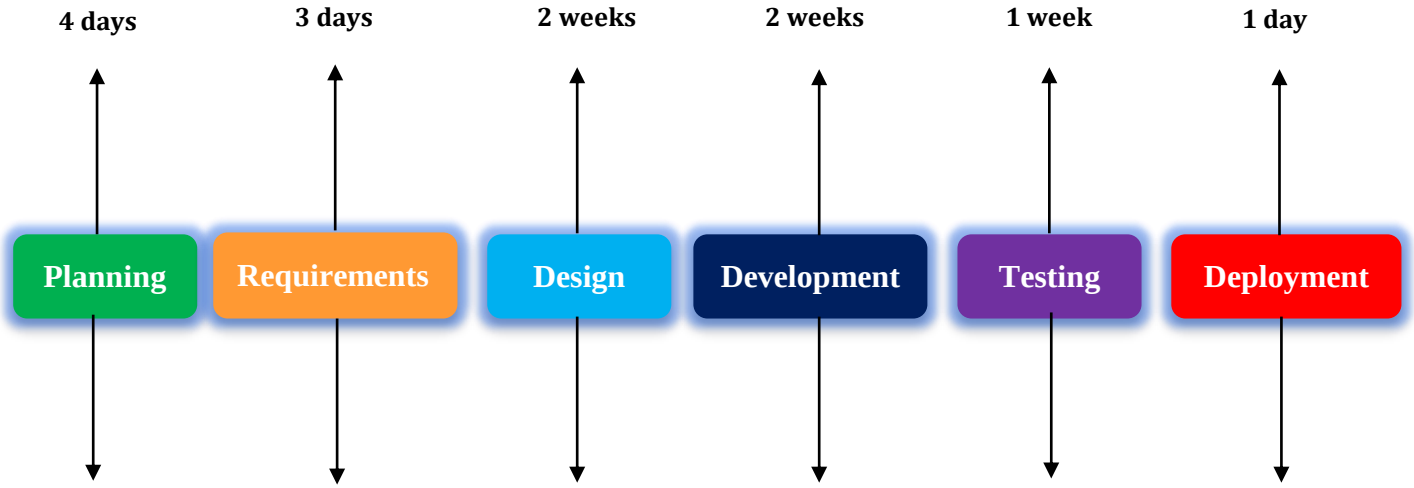
| Project Name | University Admit Eligibility Predictor |

# University Admit Eligibility Predictor

## Milestone and Activity list Diagram



In this planning we will plan about the modules and features which is going to be implemented

In this part we will decide about the technology stack that we are going to implement and install the required resources

We will design the modules i.e., Login page , Dashboard , Academic Details etc.,

In the development phase , predictor will be developed which involves previous datasets and academic details of the student using algorithms

We test the model and then debug it and correct the errors

Deploying the model and submission of the project documents in Github

## Milestone and Activity list:

| Milestone | Time Required | Activity |
|---|---|---|
| Planning | 4days | In this planning we will plan about the modules and features which is going to be implemented |
| Requirements | 3days | In this part we will decide about the technology stack that we are going to implement and install the required resources |
| Design | 2 weeks | We will design the modules i.e., Login page , Dashboard , Academic Details etc., |
| Development | 2 weeks | In the development phase , predictor will be developed which involves previous datasets and academic details of the student using algorithms |
| Testing | 1 week | We test the model and then debug it and correct the errors. |
| Deployment | 1 day | Deploying the model and submission of the project documents in Github |
